Education:

- Ph.D. - Computer Science 1990 - Université de Montreal
- M.Sc. - Computer Science 1986 - Université Laval (Quebec)
- B.Sc. - Mathematics 1975 - University of Bucharest

Citizenship

USA+Canada

Positions held:

- Tenured Full Professor at Univ. of North Texas, from Sept 2013
- Tenured Associate Professor at Univ. of North Texas, from Sept 2000
- Tenure Track Associate Professor at Univ. of North Texas, Sept 1998-Aug 2000
- Tenure Track Associate Professor at Louisiana Tech University, from Dec 1997- to Aug 1998
- Tenured Associate Professor 1994-1997 at Univ. of Moncton
- Tenured Assistant Professor 1989-1994 at Univ. of Moncton
- Tenure track teaching position at University of Moncton since 1986-1989

Research

Research Philosophy

I have explored of a fairly wide spectrum of Computer Science research fields. Synergies between them are found and exploited when solving problems in a new field and they have turned out to be useful also when revisiting a familiar one. The following are some of the research fields where my work has resulted in an overall h-index of **24** and a number of high impact publications (with citation counts of most influential papers in parenthesis):

- natural language processing (627, 133, 111)
- program transformations and implementation of logic programming languages (86, 75)

- agent infrastructures, mobile code, distributed programming models, NLP-enabled knowledge-based chat agents (54)
- compiler writing, runtime systems, memory management (51, 37)
- logic programming and logic grammars (62,29)

While aware of the status of being a “visitor”, a large majority of my research papers are attempts to “paradigm shifting” rather than “paradigm consolidation” - i.e. they are typically high-risk/high reward exploratory research work. For instance, the highest ranked paper that I have co-authored is [1], currently (Jan. 2014) at more than **800** citations. It has started a fast growing new research field - Graph based Methods for Natural Language Processing with a few thousand papers and a series of 8 “TextGraphs” workshops on the subject.

On the other hand, my newest research interest is a sharp departure from everything I have worked previously. **21** out of my **24** papers published between 2009 and 2013 are focussed on modeling foundational aspects of finite mathematics driven by an effort to provide a unified theory of fundamental data types through executable shared axiomatizations and bijective data transformations. While sometime my research focus is theoretical in nature, I am a strong believer in fully replicable research. Literate programming – a complete executable specification of the concepts discussed – is a distinctive feature of these 17 papers allowing readers to easily test their technical correctness and reuse their content. Two recent NSF grants and the acceptance of the 20+ papers at competitive international conferences seem to validate this entirely new research direction.

Currently Active Research Threads

- Declarative Modeling of Finite Mathematics (Computations with Trees, Hereditarily Finite Sets and Functions, Bijective Data Type Transformations, Efficient Gödel numberings, Ranking/Unranking functions, Self-delimiting codes)
- Design and Implementation of Declarative Programming Languages
- Natural Language Processing, Logic Programming and Logic Grammars
- Scala, Java and Prolog based Agent Infrastructures
- Compilers, Run-time Systems and Automatic Memory Management
- Exact Circuit Synthesis Algorithms

- Invited Talk at AGP'99, Italy (international conference in the field of Logic Programming)
- Invited Tutorial at Logic Programming Summer School'99, Univ. of New Mexico
- Keynote Speech at INAP'96, Japan
- Invited Tutorial at ILPS'97, USA
- Invited Talk at JICLSP'98, Implementation of LP Workshop, UK
- Invited Talk at JELIA'98, Germany
- Invited conferences at MITRE Corporation (1999), Oregon Graduate Institute (1999), Simon Fraser University (1998)

Recent Conference Presentations

In the last 5 years I was *the presenter* of the following **26 papers**:

- **2012:** [50]
- **2011:** [59, 57, 56, 55, 60, 61, 62]
- **2010:** [63],[64],[65],[66],[67],[68]
- **in 2009:** [69], [70], [72], [71], [73]
- **in 2008:** [75] [74], [76], [77, 78, 79]
- **in 2007:** [80]

Teaching

Teaching philosophy

I value independent, creative thinking, and the ability to apply learnings to new situations. My teaching emphasizes *operational knowledge*: the ability to *do* things, to solve problems, by combining rigorous logic with induction and experiment. I tend to evaluate students in a way that strongly discourages recitation of passively memorized or superficially understood concepts.

While making sure that all students understand fundamental concepts and learn the most important practical skills, I put special emphasis on letting exceptional students fly as high as they can.

One of the main dangers in rapidly evolving domains, like computer science, is fast depreciation of knowledge. I tend to fight this by adapting my courses to cover key technological changes.

Finally, I think about teaching and research as activities which interoperate and stimulate each other.

Graduate Supervision:

Recent Graduate Supervision:

- **2 PhD** students (in progress) : David Haraburda (co-authored one joint paper he will present at SAC'12, NSF supported) and Fahmida Hamid (supported by the department, working as a TA)
- **3 MSc** thesis students (graduated)
 - 1 Msc thesis student graduated (2011): David Haraburda
 - 1 MSc thesis student graduated (2010): Bharat Dandala

– 1 MSc thesis student graduated (2009): Chris Gaconnet

- member of **17 PhD** thesis committees: Kino Coursey graduated 2009, Samer Hassan (graduated 2011), Hakan Ceylan (graduated 2011), Cameron Palmer, Dhanyu Amarasinghe, Ravi Sinha, Michael Mohler (graduated 2012), Geng Zheng, Jorge Reyes-Silveyra, Carmen Banea, Chee Wee Leong, Tomislav Janjusic, Oleg Garitselov (graduated 2012), Oleg Kolgushev, Thiraphat Meesumrarn, Abdullah Saudagar, Himanshu Dutta)
- member of **2 MSc** thesis committees (Brett Thompson, 2009 and Christian Loza, 2009)
- individual work with several PhD and MSc students (directed study, projects)

Other Graduate Supervision Since Joining UNT:

I have supervised the following students graduating with MSc. thesis with whom I co-authored papers in peer-reviewed conferences and workshops:

- David Haraburda
- Devender Gollapally
- Anima Gupta
- David Hurt
- Satyam Tyagi
- Qinan Zhou

as well as the following MSc. thesis students: V.G. Balamuru, P. Gupta, S. Kandaswamy, K. Valveti, G. Sun.

A *post-doctoral visitor* of mine at UNT, A. J. Garcia, is now professor at Universidad Nacional del Sur, Argentina.
